HOW TO PRINT

Use the QR code below to submit a print request which will be completed by the Digital Studio Technician. The form is also available on the library website:
pafa.org/school/library

HOW TO PAY

You will pay for your printing once it is successfully completed, and before pickup. Visit the library to pay by cash or card.

Failure to pay for your printing will result in restriction from using the print lab.

PAFA PRINT LAB

SIZE & PAPER TYPE INFORMATION

- Sheet printing up to 17x22" is done on our *Epson printers*.
- If you wish to print a size larger, we offer roll printing on our *Canon large-format printer* up to 44" wide and 100' long.
- The library supplies paper for use.

Inkjet Printing - Fine Art Papers:

You can access inkjet printing in the Print Lab for high-quality prints and with the option to print in large format, as well as the ability to use alternative and archival paper.

- **Matte Paper**

Matte Paper is a great choice for soft prints with no glare. Use this paper if you are framing your work with glass.

- **Luster Paper**

Luster Paper gives your work a slight reflection/shine, but not as high of a reflection as a typical glossy paper. This paper is resistant to fingerprints and has good color vibrancy.

- **Canvas Paper**

Canvas Paper has a texture that can make your prints look similar to a painting, and the paper is durable.

We also offer different printing materials including acetate, glossy, metallic luster, and more, depending on availability. Keep in mind inkjet paper does not have the ability to print double-sided. You may also supply your own inkjet paper for a reduced price. See pricing chart for more information.

**If you are looking for laser printing, which is more economical, fast, and suitable for paperwork, resumes, posters, etc., you can visit the library or the Print Lab for printing up to 11x17".*
