

PORTFOLIO GUIDELINES

Pennsylvania Academy
of the Fine Arts

Application to the *Fine Arts Certificate* program requires an art portfolio of **5-10 images of original work**, which will be reviewed for admission placement. Consider the **following key elements of a successful portfolio**:

TECHNICAL SKILL

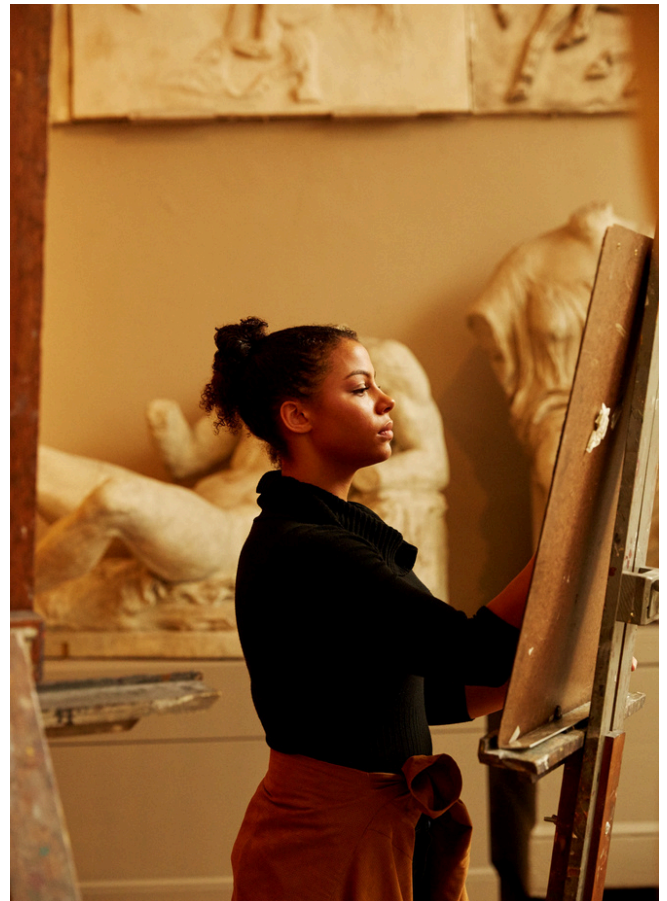

Provide **examples of observational work**, especially drawing. An observational work is any piece that you create while looking at actual subject matter, such as a still-life or portrait. We recommend not using photographs for reference, as it is important to evaluate your ability to render a three-dimensional space.

AMBITION

Ambition can mean a lot of things - experimenting with size, materials, subject matter, etc. Include **work made outside of class assignments**, and make sure you identify it as such in the description. Your work should tell us about **your goals and interests**.

CREATIVITY

Your portfolio is just that - yours! Show us the direction you want to take as an artist. Your portfolio should be **curious about the world around you and should communicate your point of view**. Do not submit fan art or copies.

UPLOADING YOUR WORK

DO:

- Take images that are clear, well lit, and focused on the work
- Crop images to get rid of outside distractors
- Use JPEG format

DON'T:

- Upload screenshots from social media
- Use distorting filters or added text

PAFA is a nonprofit institution licensed through the Pennsylvania State Board of Private Licensed Schools.
